VOLUME 2

WELCOME to the second volume of ***WHITE SKINS - WHITE PRIDE.***

The last few years has seen a number of monumental events that are of particular importance to the growing worldwide patriotic skinhead movement.

The changes that have swept the Soviet Union and the old Eastern Block countries coupled with the rise of support, and increased electoral success of patriotic parties in such countries as France, Belglum, Italy and Germany should be an inspiration to us all.

In Britain the *Blood & Honour* organisation has blossomed into a truly worldwide movement promoting the idea of White Pride.

We urge all White men and women to get active in whatever patriotic movements exist in your countries, because if the White race does not regain control if its destiny then we as a race are finished. Let us march on to victory in the spirit of our forefathers.

Tomorrow belongs to us !
